If you answered "Yes" to any of these questions, please print and bring this checklist to your veterinarian. She or he can discuss these signs and symptoms with you and determine whether or not your dog suffers from atopic dermatitis.

As with all drugs, side effects may occur. In a field study, the most common side effects were gastrointestinal signs. Gingival hyperplasia and papillomas may also occur during the initial dosing phase. ATOPICA (Cyclosporine capsules, USP) is not for use in dogs with a history of malignant neoplasia, or with a demonstrated hypersensitivity to Cyclosporine A
